Section 2 – Company Background, Services Offered & Contact Information

McQuillan Envirocare Ltd of McQuillan Companies was established in 1999 to provide hazardous waste management services in conjunction with sister company McQuillan Skip Hire Ltd, which has been providing dry waste management services since 1974. During this time, we have expanded to offer total waste management solutions to government and industries. In 2008 McQuillan Envirocare opened a state-of-the-art Analytical Laboratory on site to complement our own waste characterisation for disposal purposes and also to offer analytical services to the private and public sectors. The laboratory gained UKAS accreditation and offers full analysis of soil, water and waste-related samples.

In an ongoing drive and commitment to sustainability, McQuillan Envirocare constructed a bespoke Chemical Treatment Facility (CTF) at our hazardous waste transfer site in Antrim, officially opened in July 2014. The CTF operates in compliance with our Pollution Prevention Control (PPC) Part A Permit from Northern Ireland Environmental Agency (NIEA) and a trade effluent discharge Permit from Northern Ireland Water (NIW). The CTF can process via recovery and physico-chemical treatments over 40,000 tonnes of hazardous and non-hazardous liquid waste.

In 2016, McQuillan Envirocare constructed a Materials Recovery Facility (MRF) and Transfer Station at Budore near Dundrod to further enhance the total waste management and resource in-house solutions provided to clients and customers.

and workforce responsibilities are communicated via Employee Inductions, Internal Training, Tool Box Talks and displayed at all Company Offices and Employee mess areas.

The Compliance Department conducts a program of scheduled and unannounced inspections and planned audits. Copies of the inspection/audit reports are distributed to the Management Team. Action is taken immediately on any recommendations made following an audit or inspection. An annual audit schedule is also published to ensure our management system is fully audited and continues to perform effectively.

Risk Assessments and Method Statements – communication to employees

In dealing with all site hazards, we will implement Safe Systems of Work to ensure we meet our primary Health & Safety objective, that is, to carry out the contract within timescale to the specification as set out in the Contract Documents having due regard to the welfare of staff and operatives, without putting at significant risk their health and safety and that of any others who may be affected. The development of our safe systems of work will be a systematic examination of each task in order to identify all hazards. Our aim is to produce a safe work method that will ideally eliminate or as a minimum reduce the risks associated with the identified hazards to as low a level as reasonably practical with the primary aim of zero accidents.

Our mechanism for developing Safe Systems of Work will be through the completion of generic and site-specific Risk Assessment and Method Statement. We will involve our workforce when developing safe systems of work. To ensure that the system of work produced is effective and practical as well as safe. We believe that involving our employees with the process helps them to understand why this level of control has to be established and maintained. We deliver this information to our workers through recorded tool box talks.

We have developed a standard procedure HSP01 Risk Assessments & Method Statements for this purpose.

EP03 – F01	Integrated Management System	Page 7 of 20
	McQuillan Environmental Supplier Information & Duty of Care	Revision: 7 (01/07/25)

Accident & Incident, Investigation & Reporting

HSP03 Accident & Incident Investigation & Reporting outlines the procedures that are to be adopted when any employee, contractor or member of the public or contractor is involved accident, incident, near-miss or dangerous occurrence on McQuillan Companies sites or premises or while carrying out their duties on behalf of McQuillan Companies.

The actions required if a near-miss or non-injury incident occurs;

The actions required if an accident occurs where first aid treatment is administered;

The action that should be taken if a lost-time injury, major injury or fatal accident occurs;

The key principles of accident investigation.

Plant, Equipment and Vehicle Maintenance Owned and Hire Equipment

To ensure that Plant, Equipment and Vehicle Maintenance Owned and Hire Equipment for use on site are in a safe condition before they are used, we implement a Daily Check and Defect Reporting procedure. Every driver or operator of machinery is responsible for the condition of his/her vehicle or plant when in use on the road or on site. They are responsible for the completion of a Daily Check Sheet and the reporting of any defects. Safety inspections are carried out by our insurers (under LOLER 1998 Regs) on all lifting equipment, on an annual basis. Records of these will be maintained by the Plant Director. Should the company own any equipment used to lift people this will be formally inspected every 6 months. McQuillan Companies implement an 8-weekly inspection and maintenance plan for all Company Fleet.

Section 5 – Environmental

Environmental management an integral and fundamental part of our everyday business. We are committed to monitoring and continual improvement of our environmental performance, pollution prevention and environmental protection. Our Environmental Operational Procedure on Waste Management & Duty of Care enable all McQuillan Companies staff to handle controlled and hazardous waste correctly by complying with all relevant legislation. Any McQuillan Companies staff who produce and/or arrange for the collection of waste is responsible for ensuring a waste transfer note or Consignment Note is completed and retained once the waste has been transferred. They must also ensure only registered waste carriers are used to collect the waste and it is taken to an authorised facility.

EP03 – F01	Integrated Management System	Page 8 of 20
	McQuillan Environmental Supplier Information & Duty of Care	Revision: 7 (01/07/25)

McQuillan Envirocare operates non-hazardous and hazardous waste facilities authorised by the Northern Ireland Environment Agency – refer to *Section 7 - Compliance Register* for a list of McQuillan Envirocare’s Permits, Waste Management and Carriers Licences. The permitted waste types and operations are documented in the Site Management Plans, including the list of EWC Codes accepted, copies are available if requested.

Section 6 – Training & Competence

We place a strong emphasis on training and as a consequence maintain a team of management and operatives who are experienced and competent to deliver on quality. All employees joining the Company receive a detailed Health & Safety Induction. At induction they are introduced to the Company procedures. We employ personnel, who are competent to carry out their role on the basis of appropriate education, training, skills and experience. We annually develop a training programme (Competence Development Plan) for each employee which involves assessing training needs, providing training to satisfy the relevant needs and maintaining records of attendance and achievements. We have developed a standard procedure MP01 Competence & Awareness for this purpose.

McQuillan Envirocare and staff are active members in The Chartered Institution of Wastes Management (CIWM), which supports us to achieve and maintain the highest standards of best practice and technical competence. We support CIWM NI annual waste management conference along with a programme of technical meetings, site visits, seminars and social events. We also support and participate in sustainable technology sector events such as SustainEx and Business in the Community Environmental Benchmarking Survey.
